FURUKAWA CO., LTD.

< Verification Objectives >

DNV Business Assurance Japan K.K. (hereinafter, "DNV") has been commissioned by FURUKAWA CO., LTD. (hereinafter, "the Organization") to conduct an independent verification of the calculation results for greenhouse gas emissions (hereinafter, "GHG emissions") for the FY2024 of the organization. The objective of this verification is to confirm that the GHG emissions by the Organization have been calculated and reported appropriately based on the calculation standards, and to express an independent opinion.

< Verification Scope >

The scope of this verification covers Scope 1 and Scope 2 emissions of the organization for FY 2024.

< Calculation and Verification criteria >

The criteria for calculating and reporting GHG emissions to be verified are ISO 14064-1:2018 and The GHG Protocol: Corporate Accounting and Reporting Standard. The criterion for verification is ISO 14064-3:2019.

< Verification Process and Methodology >

The reviews of the GHG emissions and others calculation results, relevant documentation and records, and subsequent follow-up interviews have provided DNV with sufficient evidence to determine the fulfilment of stated criteria.

< Verification Statement >

It is DNV's opinion that with a limited level of assurance, nothing has come to our attention which causes us to believe that the claims of the GHG emissions of the organization are not accurately reflected in the calculation results, in accordance with the verification criteria identified as stated above. In addition, as an independent third party, DNV has no financial dependencies on the Organization at the group level, not limited to this verification work.
