

【Environmental Efforts】

《Basic Approach》

Based on its Charter of Corporate Conduct and Basic Environmental Management Principle, the Furukawa Company Group is determined to contribute to the realization of a sustainable society through eco-friendly business activities.

With respect to measures against global warming, we are working to achieve our Medium-term Reduction Targets.

With regard to risk management, we are identifying all foreseeable risks and we are implementing preventative measures while enhancing and reinforcing responses to disaster risks.

Furthermore, we will continue our business activities such as complying with laws, developing eco-friendly products, and promoting the development of technologies in order to reduce our impact on society and ecosystems as much as possible.
